Re: City of Elgin - Water Project

October 28, 1975

Anderson - Perry & Associates
P. O. Box 1301
LaGrande, Oregon 97850

Gentlemen:

A Final Inspection of the work performed by Marshall Associated Contractors, Inc. and Pacific Tank & Construction Corporation on the City of Elgin's Water Project was made by Farmers Home Administration representatives and Howard Perry on October 10, 1975.

Generally construction was found to be acceptable to Farmers Home Administration. The one item which concerned us was the paving work done by Marshall Associated Contractors, Inc. This work was found to be marginal. Under the terms of the Contract, the Contractor should understand that if the paving fails during the one year warranty period, he will be responsible for the replacement of the pavement.

When construction of these two schedules is completed satisfactorily, the following documentation must be completed and submitted to Farmers Home Administration so that we can final out the Project:

1. Engineer prepares the Final Payment Estimate.
2. Engineer Certifies construction was completed in accordance with the approved Plans and Specifications.
3. City accepts the construction by Council action.
4. Engineer prepares AS-BUILT Plans as called for in the Engineering Agreement.
5. Evidence is provided showing the Contractors have the required Maintenance Bonds in effect.

Little activity was observed on the Schedule of Work being performed by Willis Mechanical Contractors, Inc. Please keep us informed as to Willis Mechanical's plans to complete the Project and if it will be completed on schedule.

Sincerely,

DANIEL H. FRASER, P.E.
Civil Engineer
